

SCHOOL OF CHEMISTRY - SAMPLE FIRST YEAR TIMETABLE

Activity Key: Labs Lectures Workshops Tutorials Independent/self study

Semester one (September – December)

	MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY	
9.00 – 10.00		CHEM10520 Transferable Skills for Chemists Skills sessions will run from weeks 1-6 and will entail a variety of workshop and lecture activities		CHEM10101 Introductory Chemistry Lecture		
10.00 - 11.00	CHEM10600 Chemistry Labs 10-4pm The year group is split into two, and each group will attend 6 sessions in the synthesis and measurements labs during each semester		CHEM10520 Transferable Skills for Chemists Skills sessions will run from weeks 1-6 and will entail a variety of workshop and lecture activities	<i>Optional, or 'subsidiary' course</i> Most courses will have two hours of lectures and/or tutorials per week, the exact time will depend on which course is chosen. NOTE: Chemistry 'with' degrees may have a compulsory subsidiary course unit		CHEM10101 Introductory Chemistry Lecture
11.00 - 12.00		CHEM10101 Introductory Chemistry Lecture	CHEM10101 Introductory Chemistry Lecture	<i>Optional, or 'subsidiary' course</i> Most courses will have two hours of lectures and/or tutorials per week, the exact time will depend on which course is chosen. NOTE: Chemistry 'with' degrees may have a compulsory subsidiary course unit		
12.00 - 1.00				Tutorials You will be placed in a tutorial group of no more than 6, usually with students studying the same degree as you.		
1.00 - 2.00			Peer Assisted Study Sessions (PASS) Students are split into small group sessions, run by 2 nd , 3 rd or 4 th year students			CHEM10511 Quantitative Chemistry This is a self-taught course, which is designed to allow students to learn at their own pace. The course is supported by extensive online material and drop-in 'clinics', where students can come along with their own questions. The course is examined by three tests, which are designed to progressively build up maths confidence.
2.00 - 3.00			CHEM10101 Introductory Chemistry Workshops The year group is split into two or three smaller groups for workshops, which are problem-based sessions supported by several staff	WEDNESDAYS AFTER 1.00 PM ARE KEPT FREE FOR STUDENTS TO TAKE PART IN STUDENT UNION (SOCIETY) ACTIVITIES		
3.00 - 4.00						
4.00 - 5.00

Activity Key:  Labs  Lectures  Workshops  Tutorials  Independent/self study

SCHOOL OF CHEMISTRY - SAMPLE FIRST YEAR TIMETABLE

Activity Key: Labs Lectures Workshops Tutorials Independent/self study

Semester two (January – May)

	MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY
9.00 – 10.00		CHEM10520 Transferable Skills for Chemists Skills sessions continue in selected weeks of semester two, and activities include group work towards a poster presentation, as well as extension of mathematics skills			
10.00 - 11.00	CHEM10600 Chemistry Labs 10-4pm The year group is split into two, and each group will attend 6 sessions in the synthesis and measurements labs during each semester				<i>Optional, or 'subsidiary' course</i> Most courses will have two hours of lectures and/or tutorials per week, the exact time will depend on which course is chosen. NOTE: Chemistry 'with' degrees may have a compulsory subsidiary course unit
11.00 - 12.00		CHEM10212 Basic Physical/Theoretical Chemistry lecture	CHEM10212 Basic Physical/Theoretical Chemistry lecture		<i>Optional, or 'subsidiary' course</i> Most courses will have two hours of lectures and/or tutorials per week, the exact time will depend on which course is chosen. NOTE: Chemistry 'with' degrees may have a compulsory subsidiary course unit
12.00 - 1.00		CHEM10412 Organic Chemistry lecture	Tutorials Remaining in the same tutorial group, tutorials continue in semester two, but with a different tutor to support each Chemistry course. One of these tutors is your personal tutor, in order to ensure that this contact continues throughout your studies.		
1.00 - 2.00		PASS Scheme meetings			
2.00 - 3.00		CHEM10312 Basic Inorganic Chemistry lecture	WEDNESDAYS AFTER 1.00 PM ARE KEPT FREE FOR STUDENTS TO TAKE PART IN STUDENT UNION (SOCIETY) ACTIVITIES	CHEM10312 Basic Inorganic Chemistry lecture	
3.00 - 4.00				CHEM10412 Organic Chemistry lecture	
4.00 - 5.00
